Results of examination:

Numerous hairs were found on the Q164 and Q165 bed sheets. The hairs include brown to black head, pubic and limb hairs of Caucasian origin. Also, one dark brown head hair of Negroid origin was found on Q165. The range of characteristics exhibited by the Caucasian hairs suggests that they are from more than one person. Some of the hairs are deteriorated and dirty, similar to hairs from floor debris.

A few of the Caucasian head hairs from Q164 and Q165 are similar in some microscopic characteristics to hairs previously found on items from the Mustang and Memphis scene but do not match in all microscopic characteristics. The possibility that these hairs originated from the same source could not be eliminated.

No fibers were found on Q164 or Q165 that could be associated with the Q13 bedspread or with other cloth items previously submitted from the Memphis scene or from the Mustang.

The Q171 keyhole saw is old. The brand or source of Q171 could not be determined.

Some similarities were noted between the handwritten word "florida" and other variations of this word appearing on Q167 when compared with available writings attributable to Eric S. Galt. The limited nature of the writings on Q167 precluded a more definite opinion.

The hand printing on Q170 (Jimmy Owen) is upper- and lower-case, while previous hand printing on items received has been upper-case letters. For this reason, it could not be determined whether this name was prepared by Galt; however, differences were noted.

The printed words "P TTED" and either "PUNCH" or "BUNCH" were faintly inscribed on the newspaper designated Q169. Any significance of this is not known.

No previous road maps similar to Q166 have been received.
